Jaro Sodek, Canada

Abstract Solicitation

The program will be selected
from Abstracts submitted in
the following areas:

Structural Studies of Mineral in Vertebrates and Invertebrates

Structure and Functions of Mineralized Tissue Matrix Proteins

Molecular Basis of Diseases of Mineralized Tissues

Calcification Mechanisms

Cell-Mineral and Matrix- Mineral Interactions

Molecular Biology and Gene Regulation in Mineralized Tissues

Cell Biology of Chondrogenesis, Odontogenesis, and Osteogenesis

Chemistry and Biology of Mineralized Tissues

Proceedings of the Fourth International Conference on the Chemistry and Biology of Mineralized Tissues held in Coronado, California on February 5-9, 1992

Editors:

Harold Slavkin

School of Dentistry
Center for Craniofacial Molecular Biology
Los Angeles, California, USA*

and

Paul Price

*University of California-San Diego
Department of Biology
La Jolla, California, USA*

1992

Excerpta Medica, Amsterdam - London - New York - Tokyo

Contents

Session I - Collagen cross-linking and biomineralization

M. Nimni and M. Glimcher, Chairpersons

Introduction	3
Short range organization of the Ca-P mineral phase in bone and enamel, changes with age and maturation C. Rey and M.J. Glimcher	5
Some factors which modulate osteogenesis induced by demineralized bone matrix M.E. Nimni, P. DiCesare, M. Yazdi, J. Villanueva, B. Strates and D.T. Cheung	19
Is the antioxidant, anti-inflammatory, putative new vitamin, PQQ, involved with nitric oxide in bone metabolism? P.M. Gallop, M.A. Paz, R. Flückiger, A. Bishop and E. Henson	29
Collagen cross-linking and mineralization M. Yamauchi, G.S. Chandler and E.P. Katz	39
Applications of mineral quantitation of bone by histogram analysis of backscattered electron images A. Boyde, P.G.T. Howell, T.G. Bromage, J.C. Elliott, C.M. Riggs, L.S. Bell, M. Kneissel, S.A. Reid, J.A.P. Jayasinghe and S.J. Jones	47
Computer simulations of bone collagen cross-linking patterns E.P. Katz, E. Billings, M. Yamauchi and C. David	61

Session II - Phylogenetic studies of extracellular matrix (ECM) mediated biomineralization.

H.A. Lowenstam, Chairperson

Introduction	71
Carbonate apatite-containing shell plates of a barnacle (Cirripedia) H.A. Lowenstam, S. Weiner and W.A. Newman	73
The integral matrix proteins of the spicules of sea urchin embryos F.H. Wilt, C.E. Killian and B.T. Livingston	85

The mineralized collagen fibril: A building block for many vertebrate skeletal tissues	
S. Weiner, T. Arad, V. Ziv and W. Traub	93
The origin and evolution of vertebrate skeletal tissues	
B.K. Hall	103
Session III - Tissue-specific models for biomineralization	
<i>M. MacDougall, Chairperson</i>	
Introduction	115
Expression of dentin extracellular matrix proteins by odontoblastic cell cultures	
M. MacDougall, R. Rezende, J. Reyna and M. Zeichner-David	117
Structure and expression of the bovine Y-chromosomal amelogenin gene	
C.W. Gibson, E.E. Golub, W.R. Abrams, G. Shen, W. Ding and J. Rosenbloom	125
The molecular control of avian eggshell mineralization	
T.-M. Wu, D.J. Fink, J.L. Arias, J.P. Rodriguez, A.H. Heuer and A.I. Caplan	133
Matrix vesicles: Formation and function - mechanisms in membrane/matrix-mediated mineralization	
R.E. Wuthier	143
Stereochemical aspects of crystal regulation in calcium phosphate-associated mineralized tissues	
L. Addadi, J. Moradian-Oldak, H. Füredi-Milhofer, S. Weiner and A. Veis	153
Session IV - Structure and function of mineralized tissue components	
<i>W.T. Butler, Chairperson</i>	
Introduction	165
GLA-containing proteins of mineralized tissues	
P.A. Price	169
Structure/function studies of the sialoglycoproteins and proteoglycans of bone: It is still the early days	
L.W. Fisher	177

Amelogenin biochemistry - Form and function A.G. Fincham, E.C. Lau, J. Simmer and M. Zeichner-David	187
Identification and composition at the cDNA level of a novel acidic tooth protein A. George, P.A.L. Simonian, P. Tylzanowski and A. Veis	203
Mineral and collagen interaction during calcification W.J. Landis, K. Hodgens, M.J. Song, J. Arena, S. Kiyonaga and B. McEwen	211
Session V - Regulation of mineralized tissue components <i>J. Termine, Chairperson</i>	
Introduction	223
The osteocalcin gene promoter as a molecular model for determining tissue-specific expression and hormonal regulation J.W. Pike, R.A. Kesterson and S.A. Kerner	225
SPARC: A protein that modulates cell cycle and cell-matrix interactions E.H. Sage, T.F. Lane, M.L. Iruela-Arispe and S.E. Funk	235
Unusual DNA structures within the bone sialoprotein and osteonectin genes are potential candidates for transcriptional control M.F. Young, J.M. Kerr, K. Ibaraki, P. Dominguez, L.W. Fisher and P.G. Robey	243
Vitamin D-dependent regulation of extracellular matrix vesicles includes non-genomic mechanisms B.D. Boyan, L.D. Swain, M. Luna and Z. Schwartz	253
Session VI - Cell biology of mineralized tissues: Osteoblasts <i>J. B. Lian, Chairperson</i>	
Introduction	265
Analysis of the osteoblast lineage and regulation of differentiation J.E. Aubin, C.G. Bellows, K. Turksen, F. Liu and J.N.M. Heersche	267
Contributions of cell structure to integrated expression of cell growth and tissue-specific genes during osteoblast differentiation G.S. Stein, J.B. Lian, T.A. Owen, J.P. Bidwell, V. Shalhoub, E. Breen, A.J. van Wijnen and J.L. Stein	277

Regulation of osteoblast extracellular matrix formation: Post-translation regulation of extracellular matrix deposition and relationship between embryonic development and hormonal response L.C. Gerstenfeld, M. Broess, S. Bruder, A. Caplan and W.J. Landis	287
Elucidating the functions of bone sialoprotein and osteopontin in bone formation J. Sodek, J. Chen, S. Kasugai, T. Nagata, Q. Zhang, M.D. McKee and A. Nanci	297
Hormonal influence on expression of growth (H4 histone) and differentiation (osteocalcin) genes is dependent on developmental stage of the osteoblast: Modification of these regulatory controls in tumor cells J.B. Lian, G.S. Stein, T.A. Owen, R. Bortell, V. Shalhoub, A. Heinrichs, W.C. van Oordt and A.J. van Wijnen	307
Session VII - Cell biology of mineralized tissues: Osteoclasts <i>C. Minkin, Chairperson</i>	
Introduction	319
The role of metalloproteinases and their inhibitors in matrix remodeling in mineralized tissue Z. Werb	321
The role of osteoblastic cells in osteoclast differentiation T. Suda, S. Tanaka, N. Udagawa, T. Tamura and N. Takahashi	329
The regulation of osteoclast activity P. Osdoby, M.J. Oursler, L. Li, J. Pyfferoen, B.L. Riggs and T. Spelsberg	339
Session VIII - Bone, cartilage and tooth morphogenesis <i>A.H. Reddi, Chairperson</i>	
Introduction	349
Bone morphogenetic proteins and development E.A. Wang, T.N. Gerhart and D.M. Toriumi	351
EGF regulation of Meckel's cartilage morphogenesis during mandibular morphogenesis in serumless, chemically-defined medium in vitro H.C. Slavkin, L. Shum, P. Bringas Jr, Y. Sakakura, Y. Chai, M. Mayo, N. Santos and Z. Werb	361

Changes in gene expression during differentiation of cells in the odontoblastic lineage	
I. Thesleff, I. Karavanova, C. Sahlberg, A. Vaahtokari and S. Vainio	369
Hox-8 expression and patterning of the developing mammalian tooth	
M.W.J. Ferguson, A. Mackenzie and P.T. Sharpe	377
Session IX - Expression and tissue-specific consequences of gene mutations of extracellular matrix genes	
<i>K.M. Yamada, Chairperson</i>	
Introduction	387
Mutational analysis of fibronectin and its receptor	
K.M. Yamada, S. Aota and S.E. LaFlamme	389
Mapping of nucleation sites in ferritin: The influence of site-directed modifications on iron oxide mineralization	
S. Mann, V. Wade, A. Treffry, S.J. Yewdall, P.M. Harrison, S. Levi and P. Arosio	399
In vitro expression of type I collagen mutations produced by protein engineering	
S.R. Lamandé and J.F. Bateman	409
Regulation of type I α_1 collagen gene expression in murine odontoblasts	
H.F. Thomas, P.G. Indelicato, J.A. Feldman, I. Bedalov, A.C. Lichtler and C.O. Woody	417
Session X - Genetic disorders of mineralized tissue	
<i>P.H. Byers, Chairperson</i>	
Introduction	425
Molecular basis of osteogenesis imperfecta	
P.H. Byers, S.D. Chessler, B.J. Starman, M.C. Willing, G.A. Wallis, K. Kadler and D.H. Cohn	427
Paget's disease of bone	
S.M. Krane and L.S. Simon	433
Enamel protein in the different types of amelogenesis imperfecta	
J.T. Wright, C. Robinson and J. Kirkham	441

Session XI - Metabolic disorders of mineralized tissues*F.R. Singer, Chairperson*

Introduction 453

The pathogenesis of primary osteoporosis
S. Hilliker, C.R. Libanati and D.J. Baylink 455Human bone mineralization studied by in vivo tetracycline labeling:
Application to the pathophysiology of osteomalacia
A.M. Parfitt 465Congenital osteopetrosis in mammals - New windows on osteoclast biology
S.C. Marks Jr. 475Human osteopetrosis
F.R. Singer 483**Session XII - Diagnosis and therapeutic strategies for animal and human mineralized tissue disorders***P.D. Delmas, Chairman*

Introduction 489

Plasma and urinary markers of bone turnover in metabolic bone diseases
P.D. Delmas 491Bisphosphonates: New developments in structure, mechanisms of action and
clinical applications
H. Fleisch 499Intracellular receptors, bone disease, and drug discovery
R.B. Stein 507
